5. Soviet Ballistic Missile Defense:

Preparations were initiated in June to reconvene the BMD Working Group in order to develop the follow-up report for the DCI documenting the status and results of implementing the recommendations contained in the Soviet BMD Study. With the completion of the Perry Panel report on Soviet BMD, it was decided to reactivate the working group now and incorporate the Perry Panel recommendations into the CIPC follow-up report for the DCI. The reconstituted working group is scheduled to finish its review by late August and the follow-up report is scheduled to be addressed by the CIPC at the September meeting. [ ]

6. International Narcotics Activities:

The Narcotics Working Group is in the final stage of completing its follow-up report for the DCI. After coordination by the working group members, the draft will be forwarded to CIPC Principals prior to the next CIPC meeting on 5 August. The report as now written presents a rather striking record of accomplishment with over 80 percent of the recommendations already in effect or in the process of being implemented. This is not to suggest that the narcotics intelligence challenge has been met, but when contrasted to the situation a few years ago, the progress in this area has been significant. [ ]

7. Terrorism Study:

The Terrorism Study has been forwarded to the NFIC Principals for their review and coordination by 12 July 1985. Subsequently, the study will be forwarded to you and the DCI for approval. [ ]
